EE422C Project 3 (Word Ladder)

Anthony Bauer amb6869
Bryan Leon bal2457

Both of us arranged multiple meeting times to do the project. We met for a total of 7 hours where we discussed the implementation, coded the solution, wrote test cases and compiled our results into these word documents. All work was shared between the two of us. We worked together on the Breadth First Search, Depth First Search, initialization, parsing, printing, main method, testing and documentation.
